

# *Developing the Livestock Global Assurance Program*

*Peter Schuster - 26 November 2015*

# Agenda

---

- Project background and development process
- Program owner
- LGAP and ESCAS
- Components of the proposed Program
- Feedback from in-market consultation
- Next steps

*First research project completed*

2013

ALEC Resolution

First consignment under ESCAS

08/11

*Farmer Review undertaken*

A Bloody Business

05/11

06/11

The live export trade suspension

# *The project*

---

- Development of a conformity assessment program for animal welfare and management.
- Builds on previous research.
- Pilot and deliver a complete, implementable Program.
- Funded by MLA, LiveCorp and the Australian Government.
- R&D - not implementation.

# Development process

---

- Commenced Jul 2014.
- Consultative Committee (*first meeting: Sept 2014*)
  - Industry, Department and Project representatives.
  - Independently chaired.
- Wider consultation.

# *Consultation*

# Consultation

---

- Australian exporters Nov 2014, Feb, Apr, Jul, Aug, Nov 2015
- Department of Agriculture Feb 2015
- MLA/LiveCorp LEP in-market personnel Mar, Sep, Nov 2015
- Indonesian representatives Apr 2015
- Middle Eastern representatives (7 countries) Jun 2015
- Minister for Agriculture Jun 2015
- Animal welfare groups Jun, Sep 2015
- South East Asian representatives (4 countries) Oct 2015
- Peak Industry Councils Jun, Sep, Nov 2015
- Consultative Committee 10 meetings

# *Considerations*

## Approach and structure

- ISO/IEC 17007:2009
- ISO/IEC 17065:2012
- ISO/IEC 17067:2013
- ISO/IEC Guide 59:1994
- WTO - Agreement on Technical Barriers to Trade, Annex 3
- ISO 9001:2015
- ISO/IEC 31000:2009
- ISO/IEC Directives

## **Animal health, welfare and management**

- OIE Terrestrial Animal Health Code
- GLOBALG.A.P. requirements
- American Meat Institute guidelines (Temple Grandin)
- Red Tractor Assurance requirements
- Global Animal Partnership
- Assurewell
- Freedom Foods
- Council of the European Union regulations
- In-market animal welfare legislation

## **Animal health, welfare and management**

- ESCAS Animal Welfare Standard
- Animal Health Australia (AHA) land transport guidelines
- National Feedlot Accreditation Scheme (NFAS)
- Australian Meat Industry Council (AMIC) Animal Welfare Standards
- MLA/LiveCorp LEP resources/research (eg SOPs, guidelines)
- RSPCA Approved Farming Scheme

# *Basis for LGAP*

---

- Necessary due diligence.
- Nothing left to chance.
- None of the decisions have been made in isolation.
- Thorough research and consideration.

# *The Program*

## **The Livestock Global Assurance Program (LGAP)**

- An international conformity assessment program based on international precedents and science.
- Aims to foster world's best practice in the welfare and management of animals.
- Recognises areas of strength and excellence and encourages continual improvement.

# Scope

---

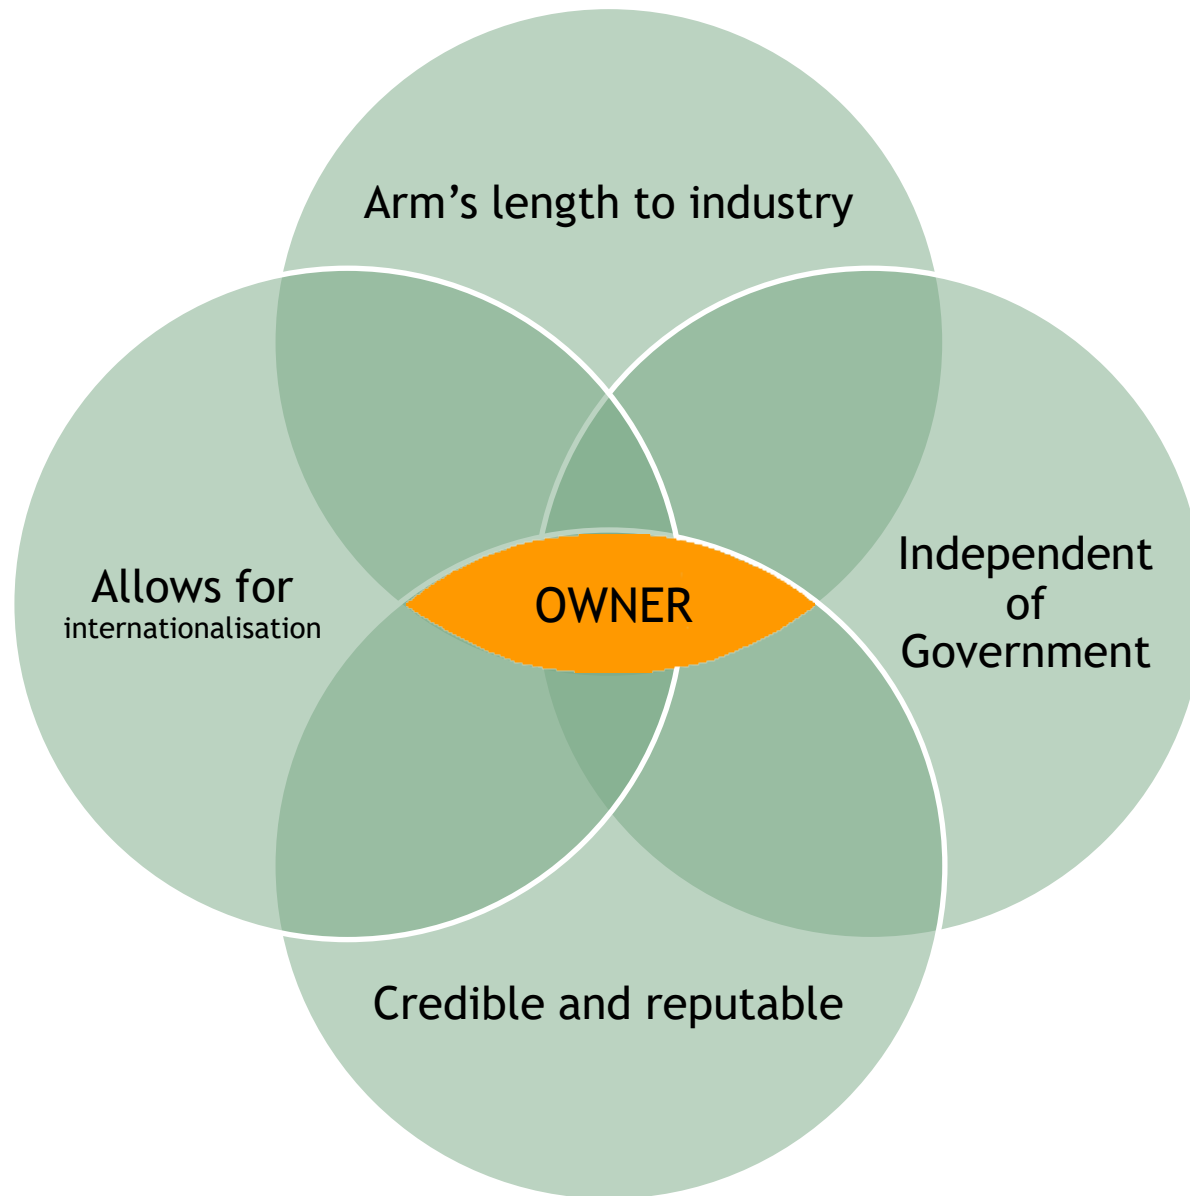

- Feeder and slaughter livestock.
- Disembarkation in-market to slaughter.
- Cattle, buffalo, sheep, goats.

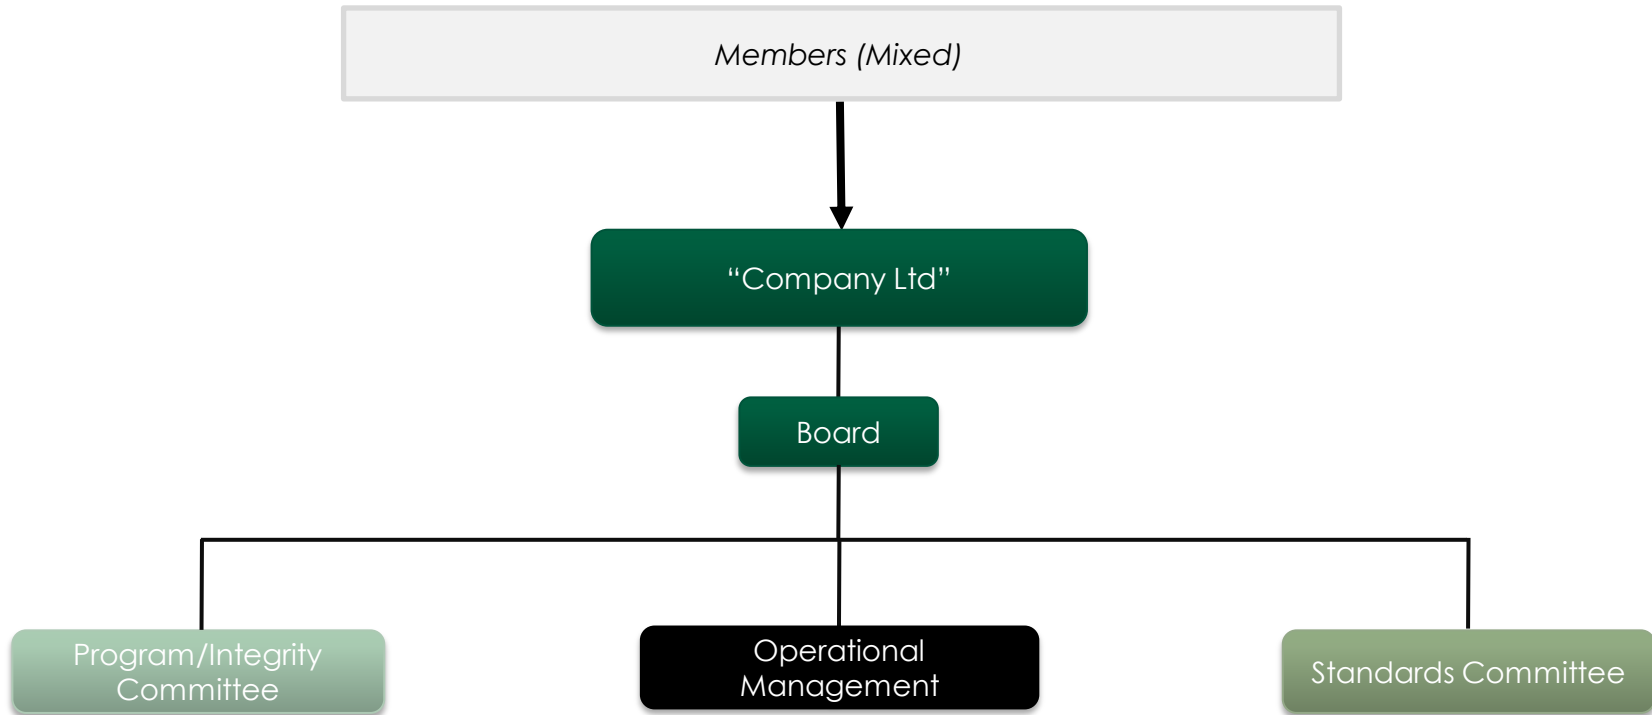

# Key criteria

---

# Program Owner structure

# *LGAP and ESCAS*

# Facilities and Operators

**“OPERATORS”**

**“FACILITIES”**

**ESCAS**

**DoA  
AUSTRALIAN  
GOVERNMENT**

# ESCAS

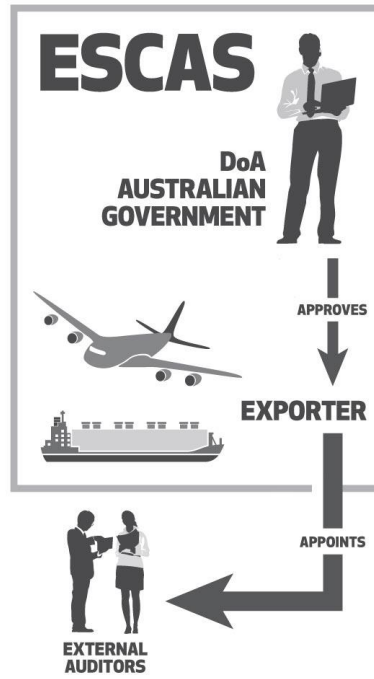

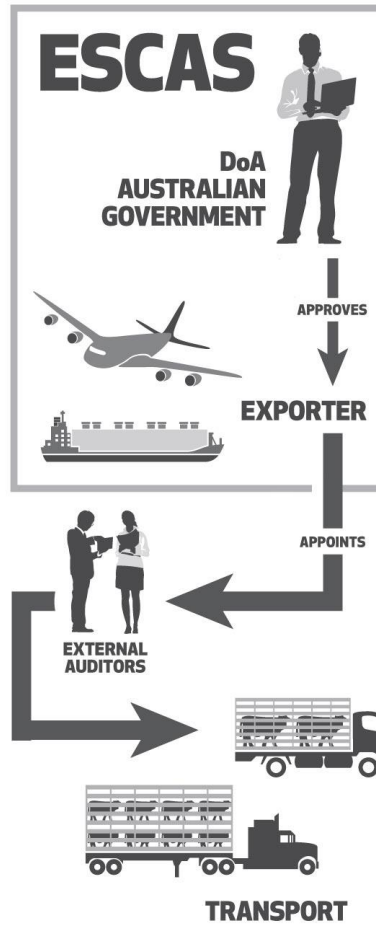

**DoA  
AUSTRALIAN  
GOVERNMENT**

APPROVES

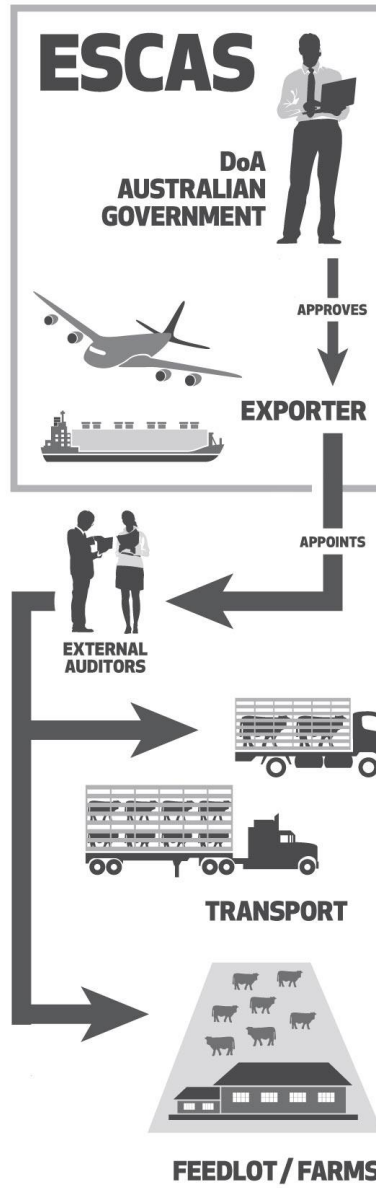

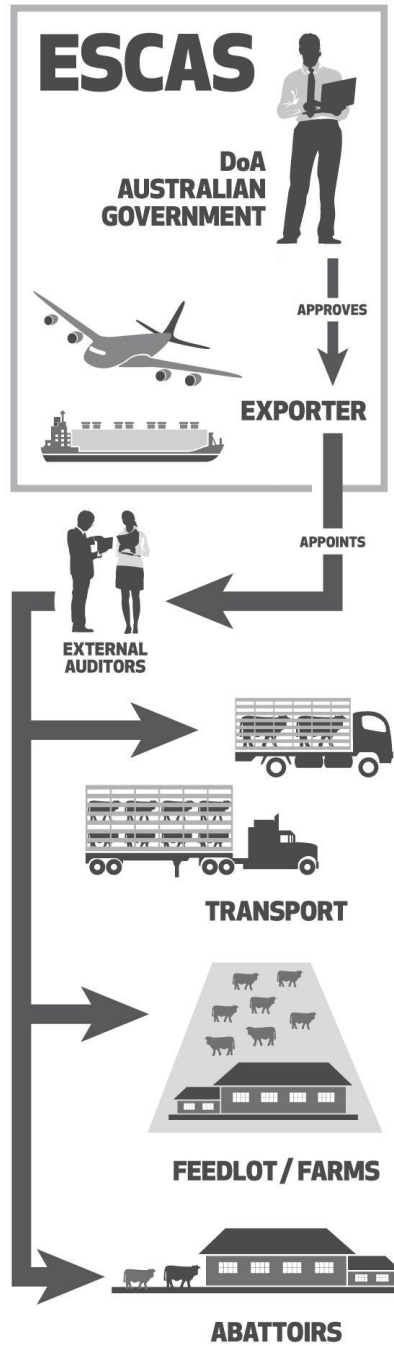

**EXPORTER**

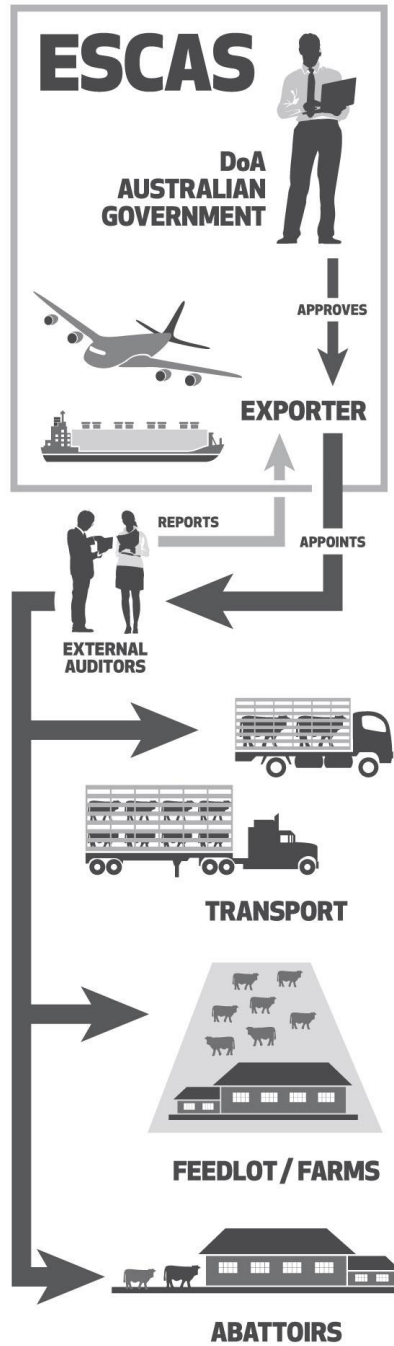

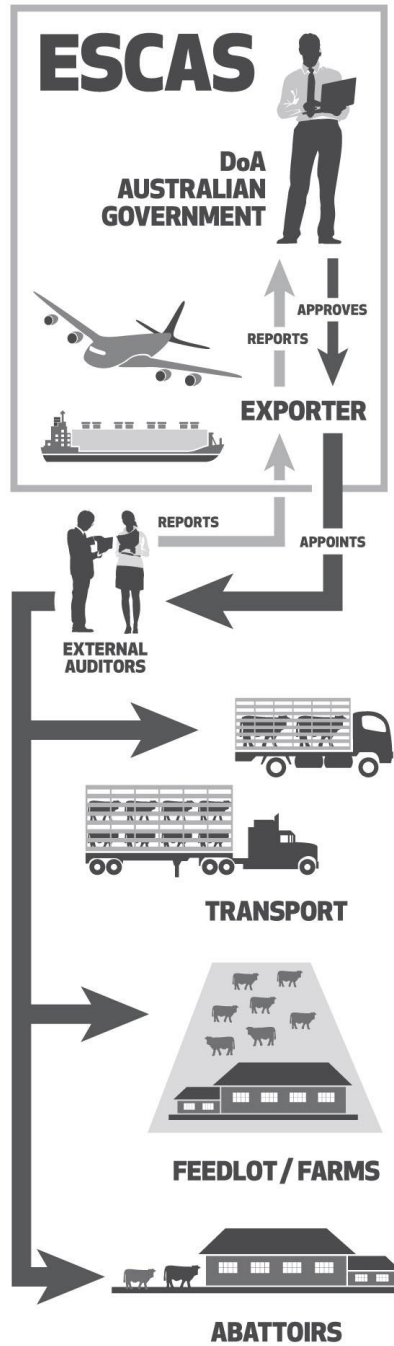

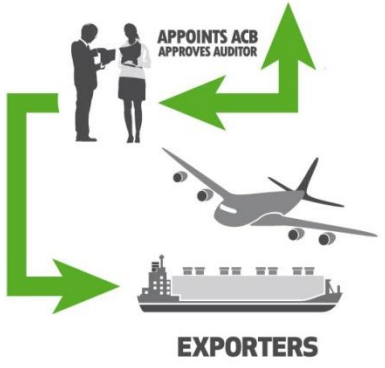

**Livestock  
Global  
Assurance  
Program**

**Livestock  
Global  
Assurance  
Program**

Program**

# *Interaction with regulation*

**Australian  
Regulation**

**Regulatory  
Enabler**

**Livestock  
Global  
Assurance  
Program**

# *The Standards*

- Requirements of the Program.
- Follows ISO and WTO guidelines for development of standards.
- Follows ISO formatting for standards:
  - *ISO 14001 Environmental management systems - Requirements with guidance for use*
- Considers appropriate standards setting process and nomenclature.

- Defined requirements for Standards Committees:
  - Balanced representation - impacted stakeholders.
  - Public comment period of not less than 60-days.
- Ten person LGAP Standards Committee.
- Inaugural meeting held - 19-20 November.
- Public comment - Review - Finalise - Release.

- *LGAP 1000 Livestock assurance - Fundamentals and vocabulary*
- *LGAP 1001 Livestock assurance - Requirements for animal welfare and management*
- *LGAP 1002 Livestock assurance - Requirements for the management system of Operators and Facilities*
- *LGAP 1003 Livestock assurance - Requirements for Operator Chain of Custody*

# *Provides flexibility (concepts only)*

---

- *LGAP 1004 - Livestock assurance - Requirements for the sourcing and preparation of livestock for export (ASEL)*
- *LGAP 1005 - Livestock assurance - Requirements for the management and breeding of livestock*
- *LGAP 1006 - Livestock assurance - Requirements for specific markets - People's Republic of China*
- *LGAP 1007 Livestock assurance - Requirements for food safety and hygiene*

# *Public comment*

---

- To be released for international public comment (60 days).
- Will be available from:

[www.livestockglobalassurance.org](http://www.livestockglobalassurance.org)

# *The Rules*

# **LGAP RULES**

**Based on international methodology (ISO)**

- **Responsibilities**
- **Interactions**
- **Obligations**
- **Program Owner**
- **Facilities**
- **Operators**
- **Certification Bodies**
- **Auditors**

# *Scopes and levels of certification*

# Facility 'Levels'

LEVEL FACTOR	Level 1	Level 2	Level 3
Equivalence	OIE	ESCAS	<i>'Best practice'</i> Founded on science and research

- Promotes continual improvement.
- Presents aspirational pathway.
- Opportunity for local livestock to come under the Program.

# *Conformance system (CS)*

# *Recording and monitoring*

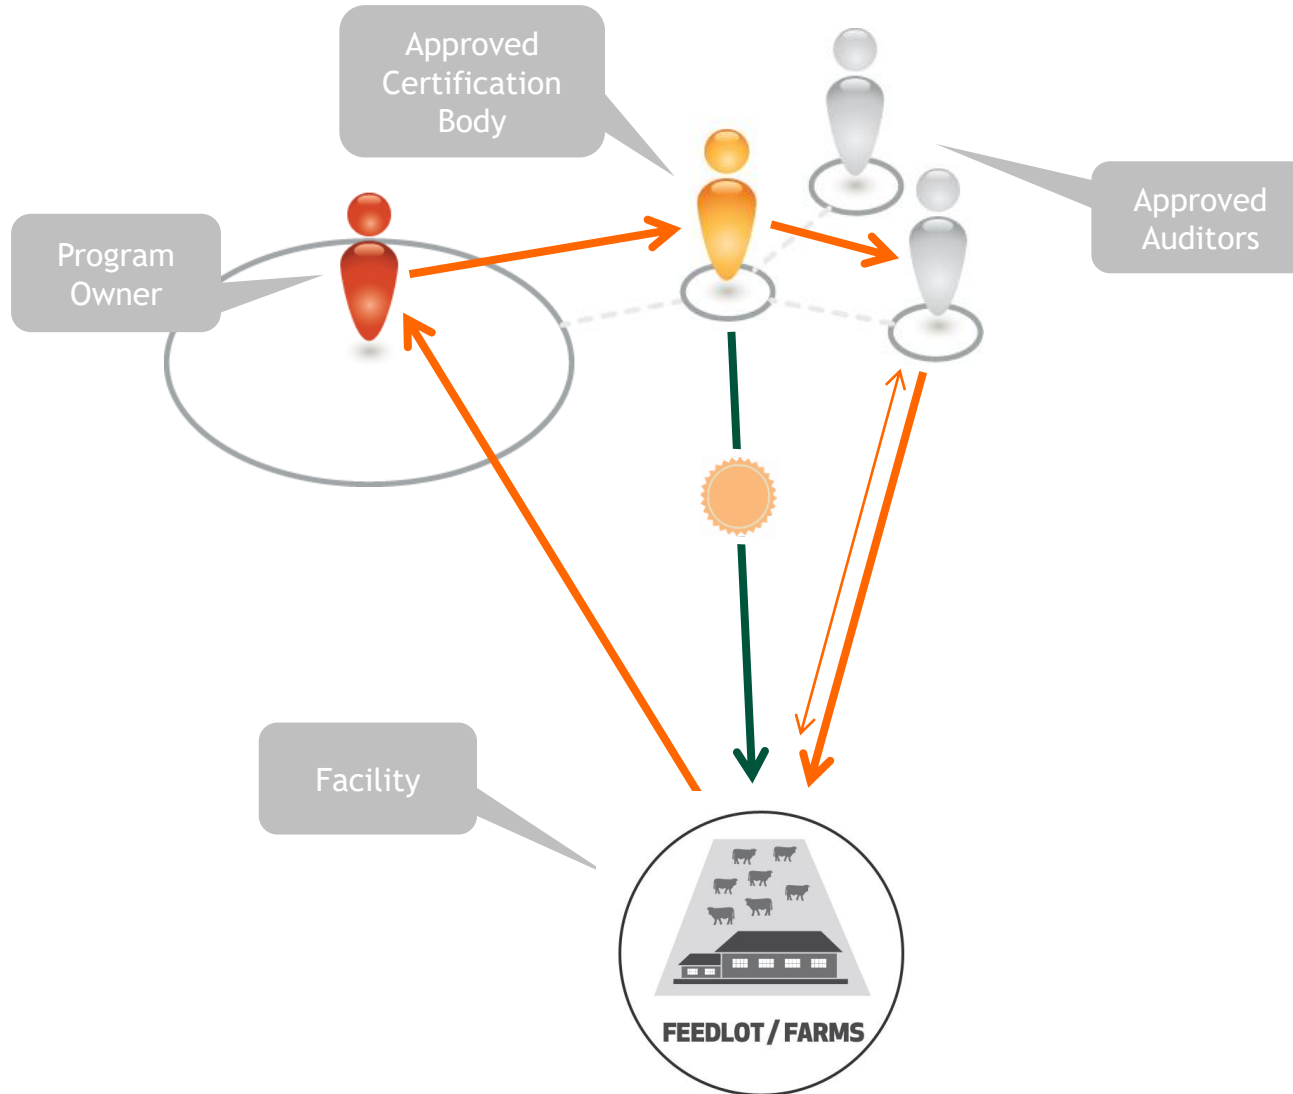

---

- Real-time visibility into conformance, performance and history.
- NOT a traceability system.
- NOT a supply chain management system.
- A tool for internal AND external audits.
- A tool for nonconformity management.
- A tool for reporting.

# *Certification Bodies and Auditors*

# External auditing

# *Nonconformities and corrective actions*

# Nonconformities

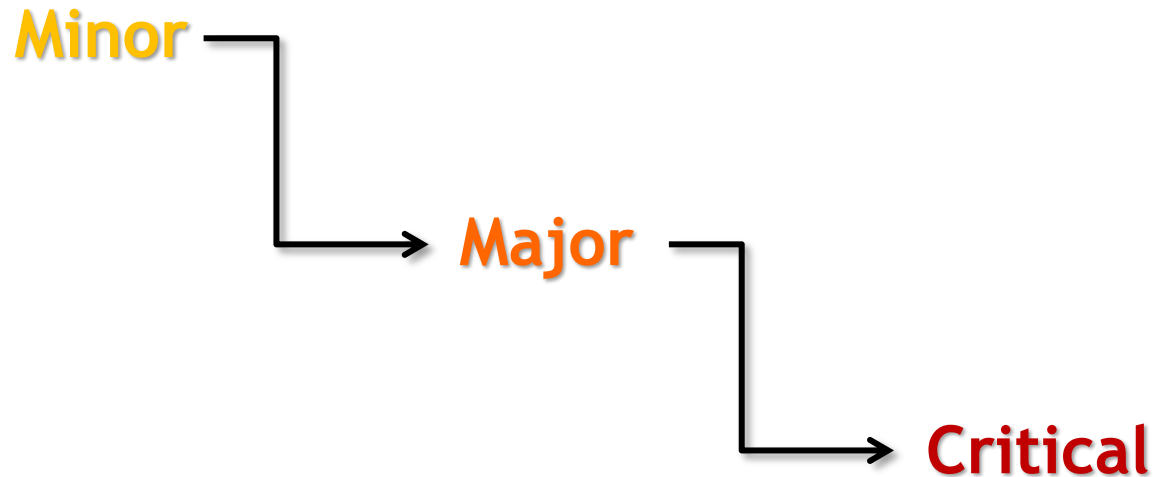

---

- Nonconformities identified during internal *and* external audits.
- Facilities and Operators close out nonconformities:
  - Submit evidence of corrective action.
- Auditors review the corrective action:
  - Consider - is it sufficient to close the nonconformity?

# Nonconformities

- The Rules determine how nonconformities will be classified.

- Escalation pathway: Suspension and withdrawal of certification

# Complaints

---

- Follows ISO 17065 for complaints and feedback.
- Requirements for how complaints are handled...  
  
and on complainants.
- Qualified complaint supported and justified.
- Action taken to review and investigate.
- If complaint upheld - leads to nonconformities, escalation.

# *Surveillance frequency and risk*

# *Risk assessment*

---

- External auditors undertake risk assessment during every audit.
- Considers risk of not maintaining conformance.
- Considers controls in place to minimise or eliminate risk.
- Outcome of risk assessment is a RISK RATING.
- Auditors do not determine the risk rating.

# *Surveillance frequency*

---

- Risk rating dictates timeframe of next surveillance activity.

# *Surveillance frequency*

---

- Risk rating dictates timeframe of next surveillance activity.

**Low risk**

**Medium risk**

**High risk**

# *Surveillance frequency*

---

- Risk rating dictates timeframe of next surveillance activity.

**Low risk**

**Medium risk**

**High risk**

**Internal audit**

# Surveillance frequency

- Risk rating dictates timeframe of next surveillance activity.

	<b>Low risk</b>	<b>Medium risk</b>	<b>High risk</b>
<b>Internal audit</b>	4 monthly	3 monthly	Monthly

# Surveillance frequency

- Risk rating dictates timeframe of next surveillance activity.

	Low risk	Medium risk	High risk
Internal audit	4 monthly	3 monthly	Monthly
External audit			

# Surveillance frequency

- Risk rating dictates timeframe of next surveillance activity.

	Low risk	Medium risk	High risk
Internal audit	4 monthly	3 monthly	Monthly
External audit	Annual	6 monthly	3 monthly

# Surveillance frequency

- Risk rating dictates timeframe of next surveillance activity.

	Low risk	Medium risk	High risk
Internal audit	4 monthly	3 monthly	Monthly
External audit	Annual	6 monthly	3 monthly
Random - 10% annually			

# Surveillance frequency

- Risk rating dictates timeframe of next surveillance activity.

	Low risk	Medium risk	High risk
Internal audit	4 monthly	3 monthly	Monthly
External audit	Annual	6 monthly	3 monthly
Random - 10% annually			

- Improvement - avoids higher audit frequencies and therefore higher costs.

# *Pilot*

# Participants

---

- Australia, Jordan, Indonesia, Malaysia.
- Piloting the entire process and all components.
- Pilot Operators, Facilities, Certification Bodies and Auditors.
- Consider outcomes - Review - Refine.

# *In-market consultation*

# *Summary of feedback*

---

- Recognition of and adherence to ISO.
- Flexibility associated with facility rather than supply chain approach.
- Use of independent, highly skilled auditors.
- Elimination of audit duplication.
- Program flexibility and ability to respond to other market drivers. Immediate opportunities exist.
- Independence from foreign government.

# *Summary of feedback*

---

- Cost.
- Capacity of smaller facilities to manage conformance.
- Support during (possible) implementation will be important.

# *Where to from here*

---

- International public comment period for Standards.
- Finalise research based on pilot process.
- Industry to consider research findings and implementation.

# *Summary*

- Designed to provide the same assurances as ESCAS but through a different, more normal mechanism.
- LGAP would become the regulatory enabler - regulation remains.
- Facilitate the long-term sustainability and continued growth of the trade.

*Thank you*
