

Handled with care: livestock in transit

Delivering welfare at sea, one animal at a time

Presented by: Tiff Davey, Renee Willis & Pat Coole

Round 1 – The Basics

Stay standing if you have ever...

**Worked in a set of yards
with livestock**

Been on a live export vessel

**Completed the stockpersons'
accreditation course**

Round 2 - The High Seas

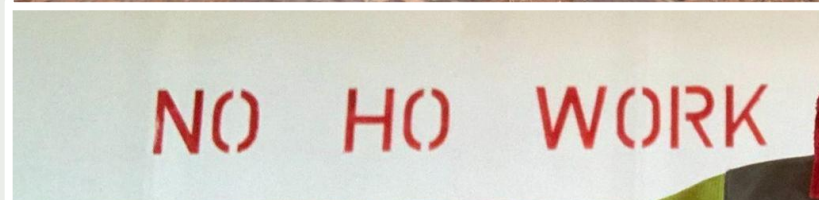

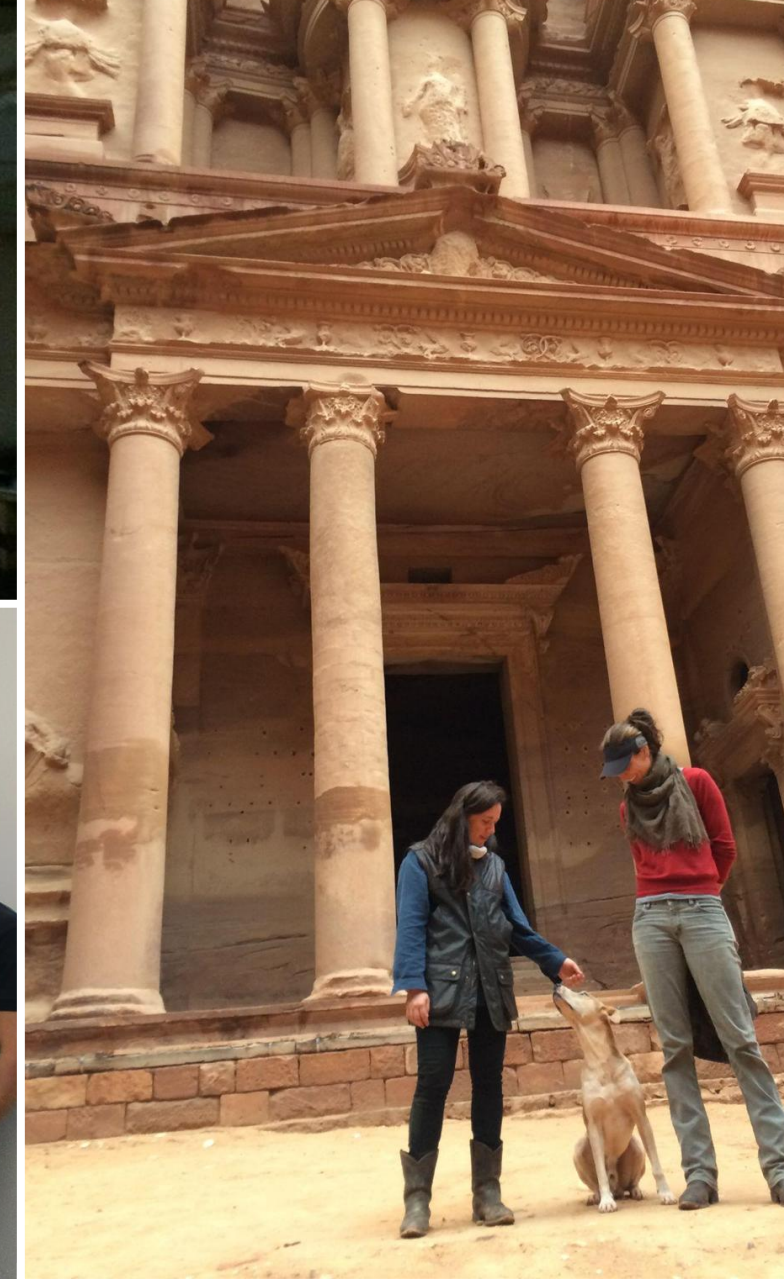

Stay standing if you have ever...

Been the head stockperson on a voyage

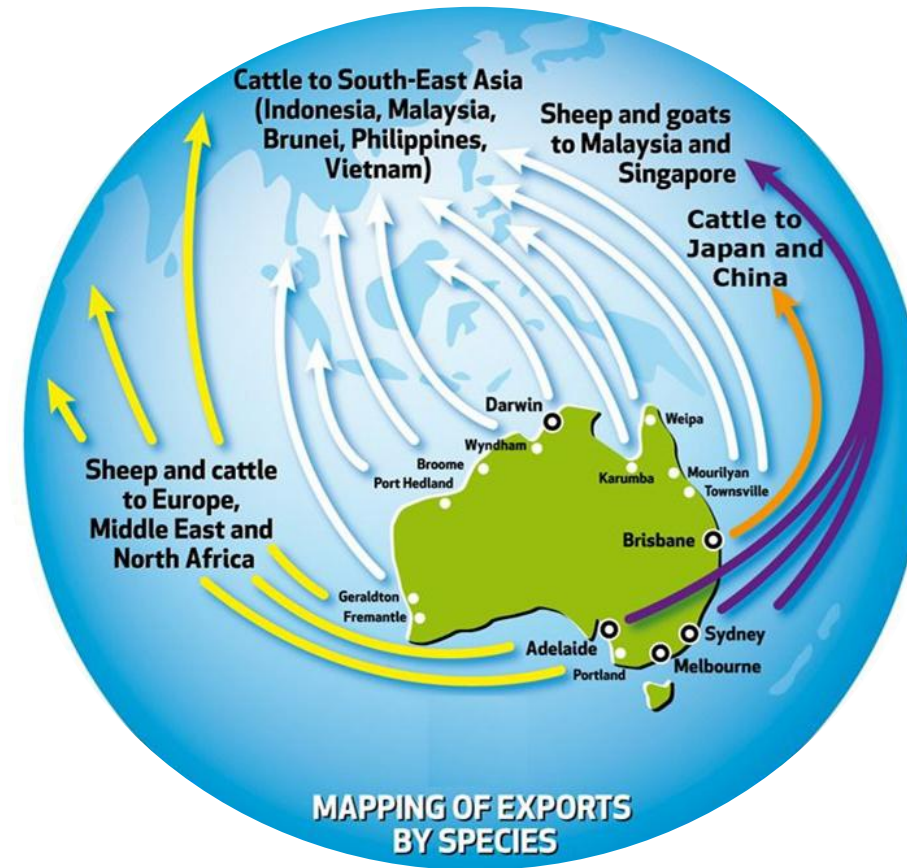

Done more than 20 voyages

Sailed through the Suez Canal with livestock

Done a voyage from a country other than Australia

Joining the vessel

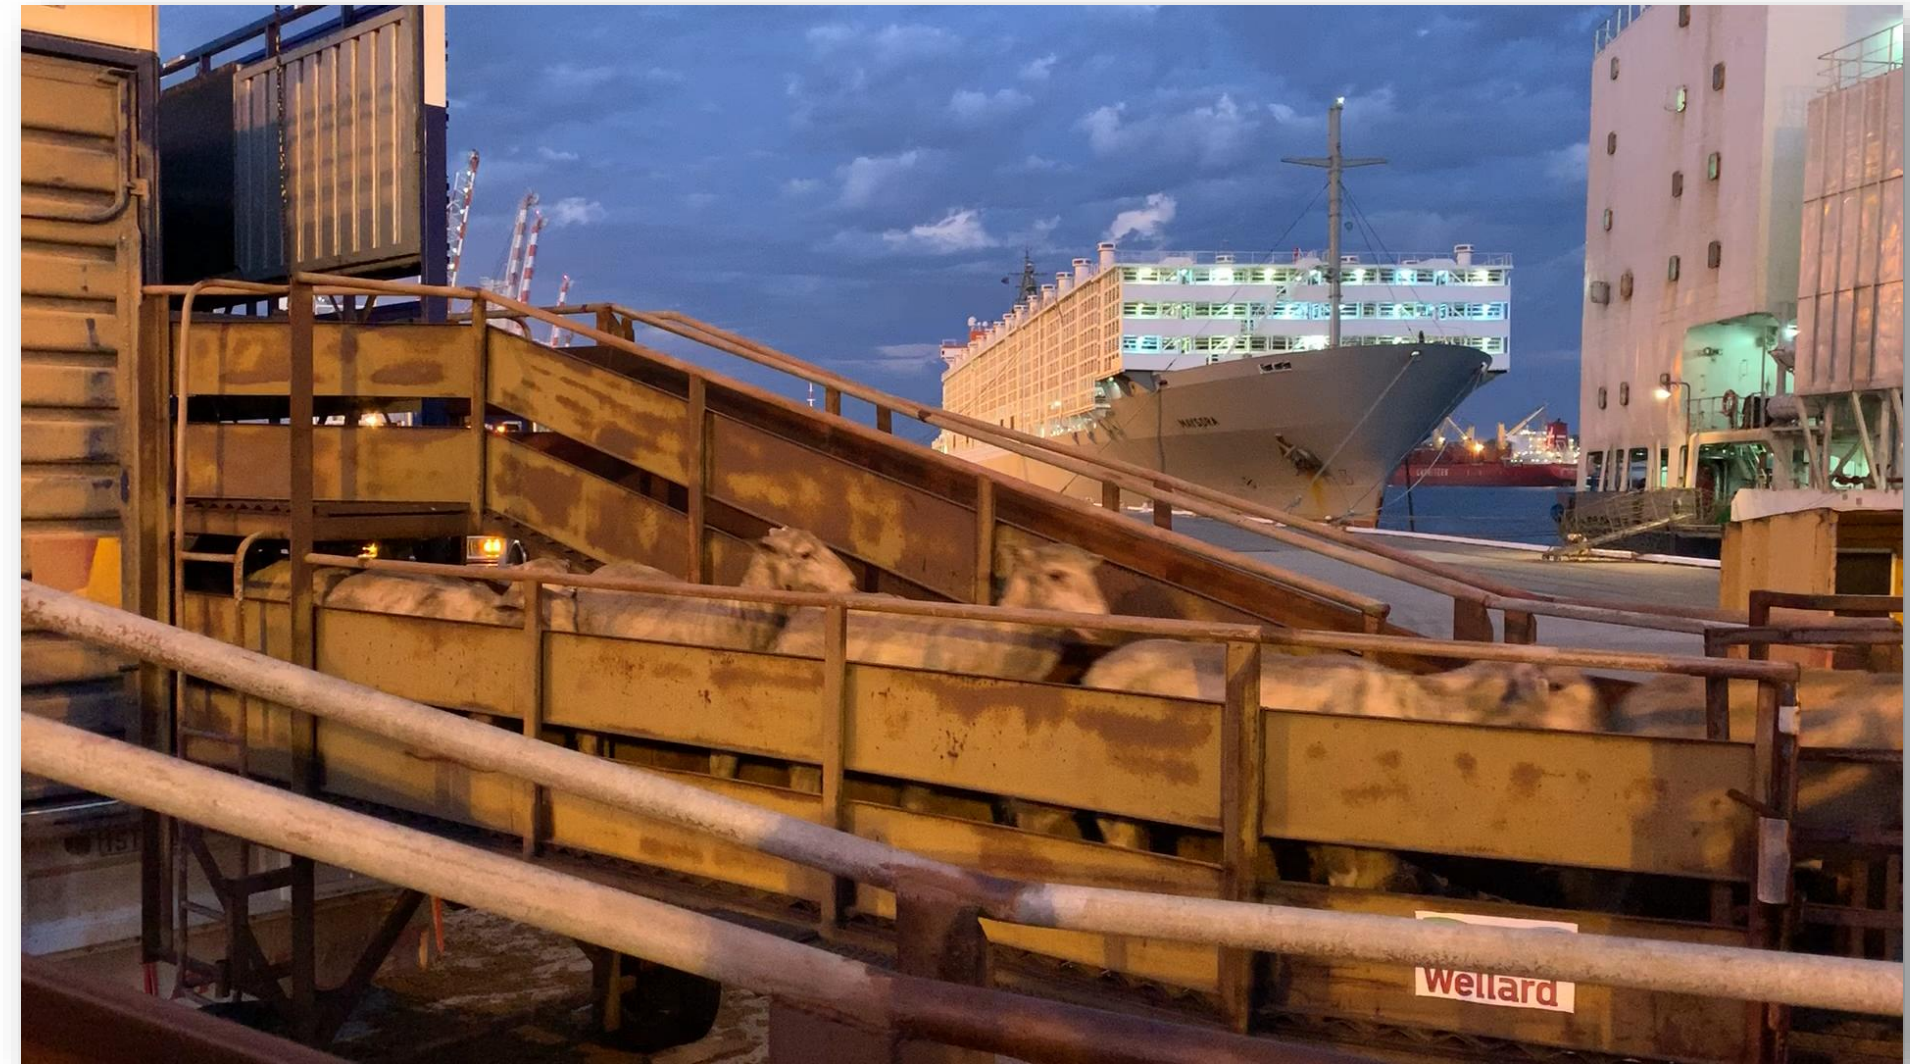

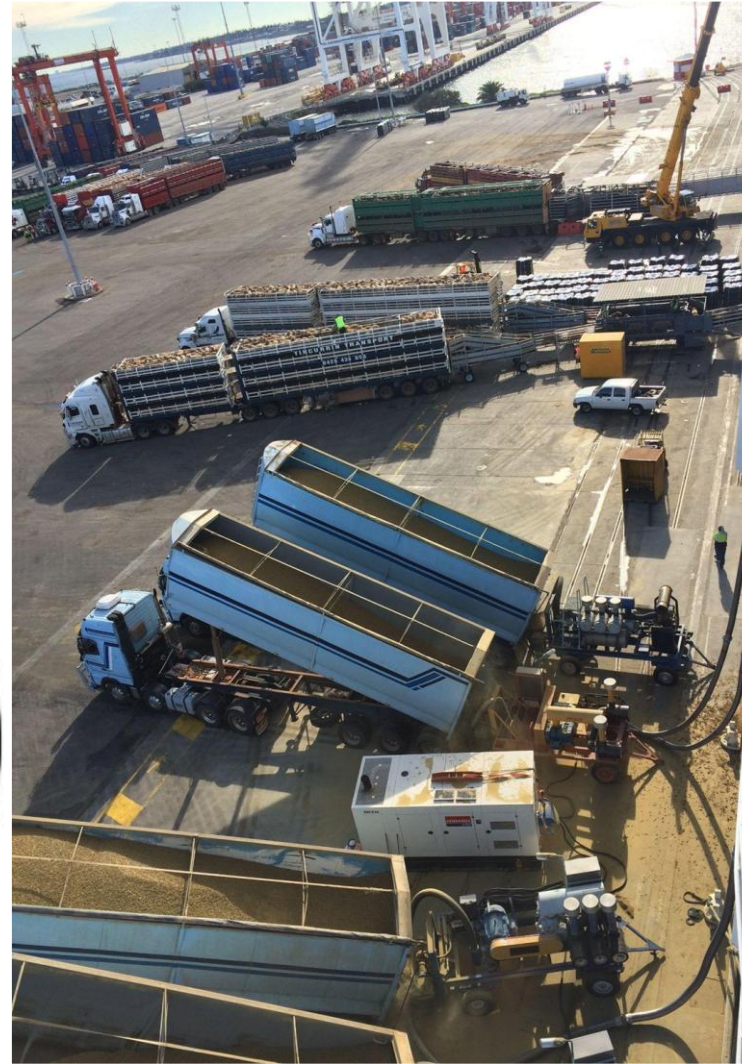

Annabelle Broun, Tips Before Coming On Board:

- Make sure you've downloaded plenty of music, podcasts, or shows on Spotify and Netflix for offline use.
- Pack lots of snacks and bring your favourite instant coffee, you'll be glad you did.
- Pick up some chocolate for the crew - it's a great way to get in their good books from day one.

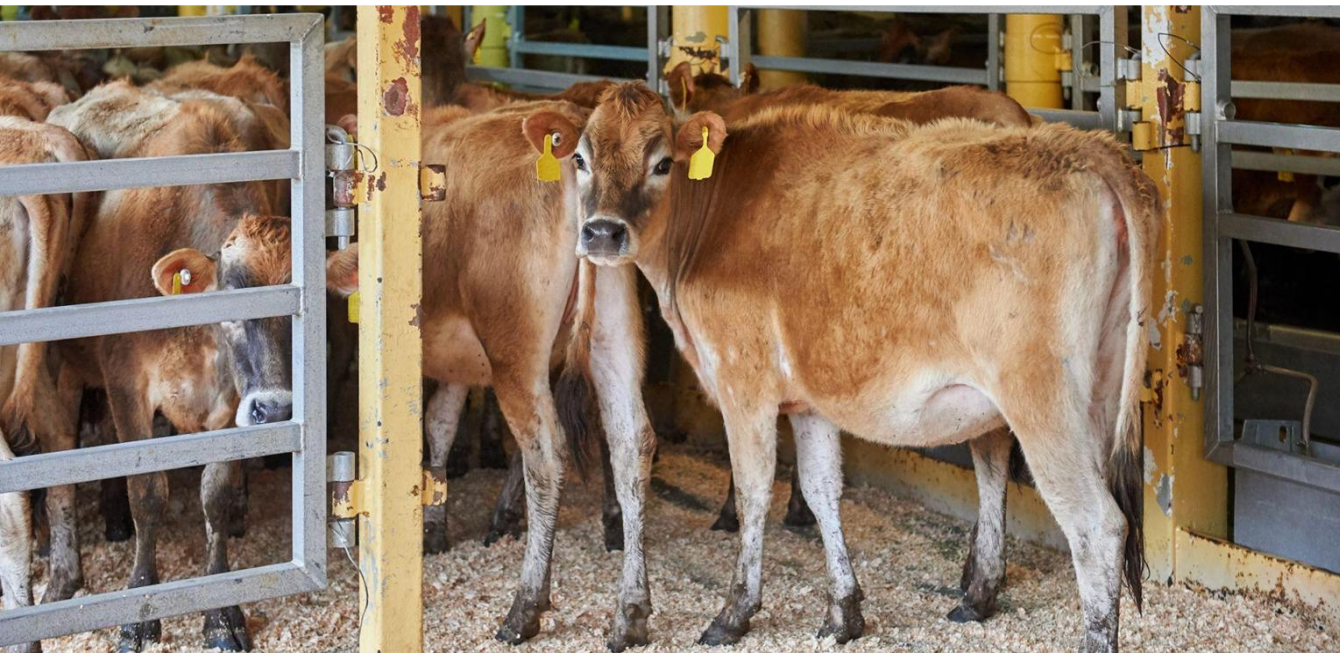

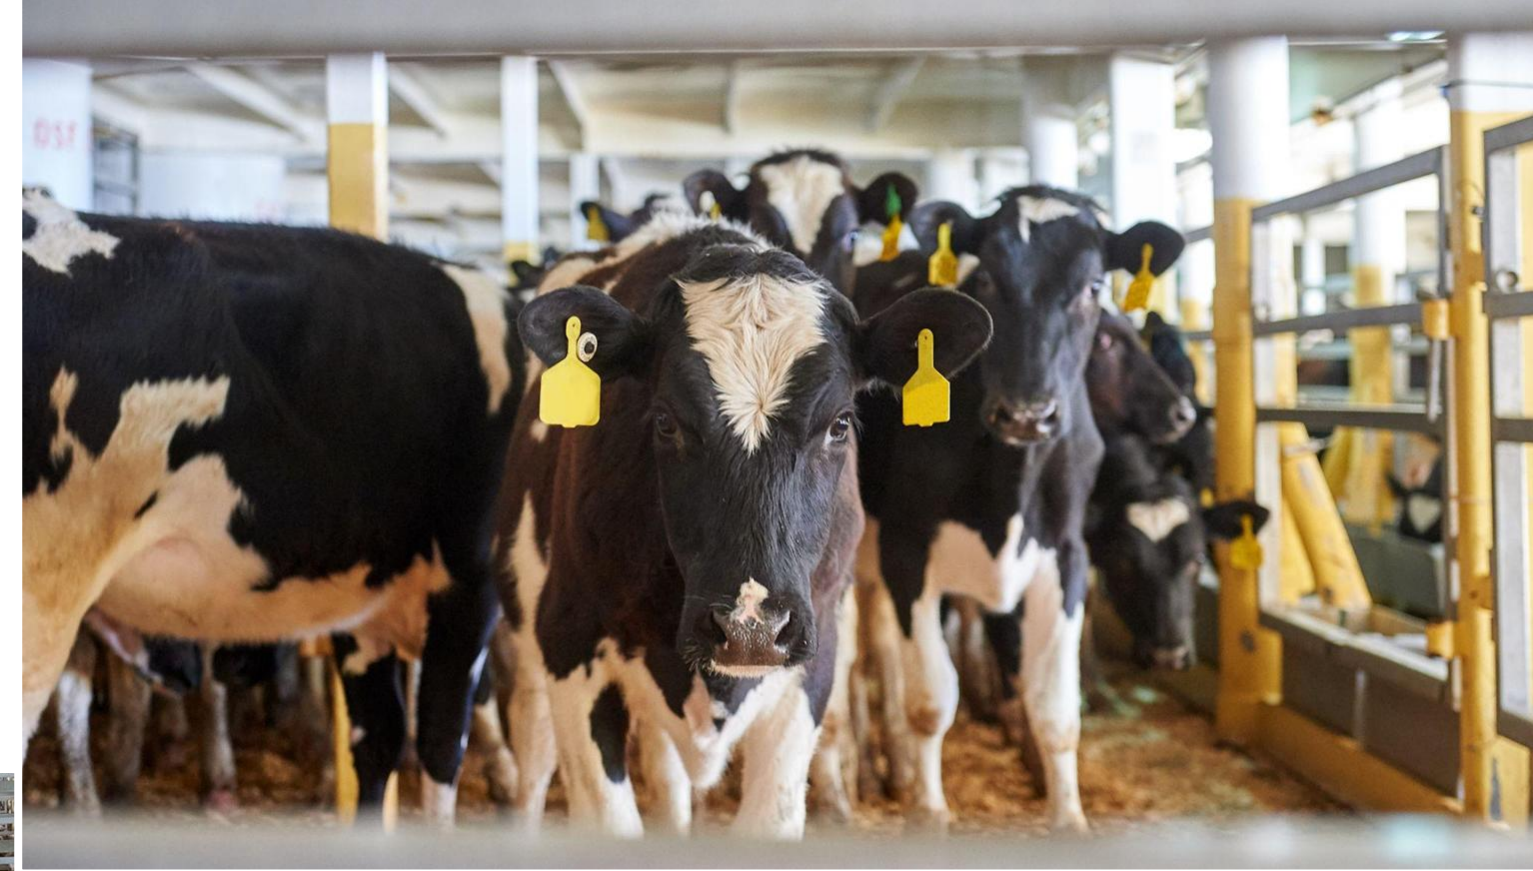

Loading

Adi Tiawarman: Every vessel is different, so it's important to understand how to maintain steady livestock flow on each one you load.

The livestock in our care

Daily routine at sea

Fi Bairds tip for the first few days:
"Spread the cattle the best you
can and tell the cook what food
you DON'T eat, saves a lot of
heartache on both sides".

Hospital pens

Dr Victoria Ferguson tip
for managing hospital
pens - "keep good
records!"

Discharge

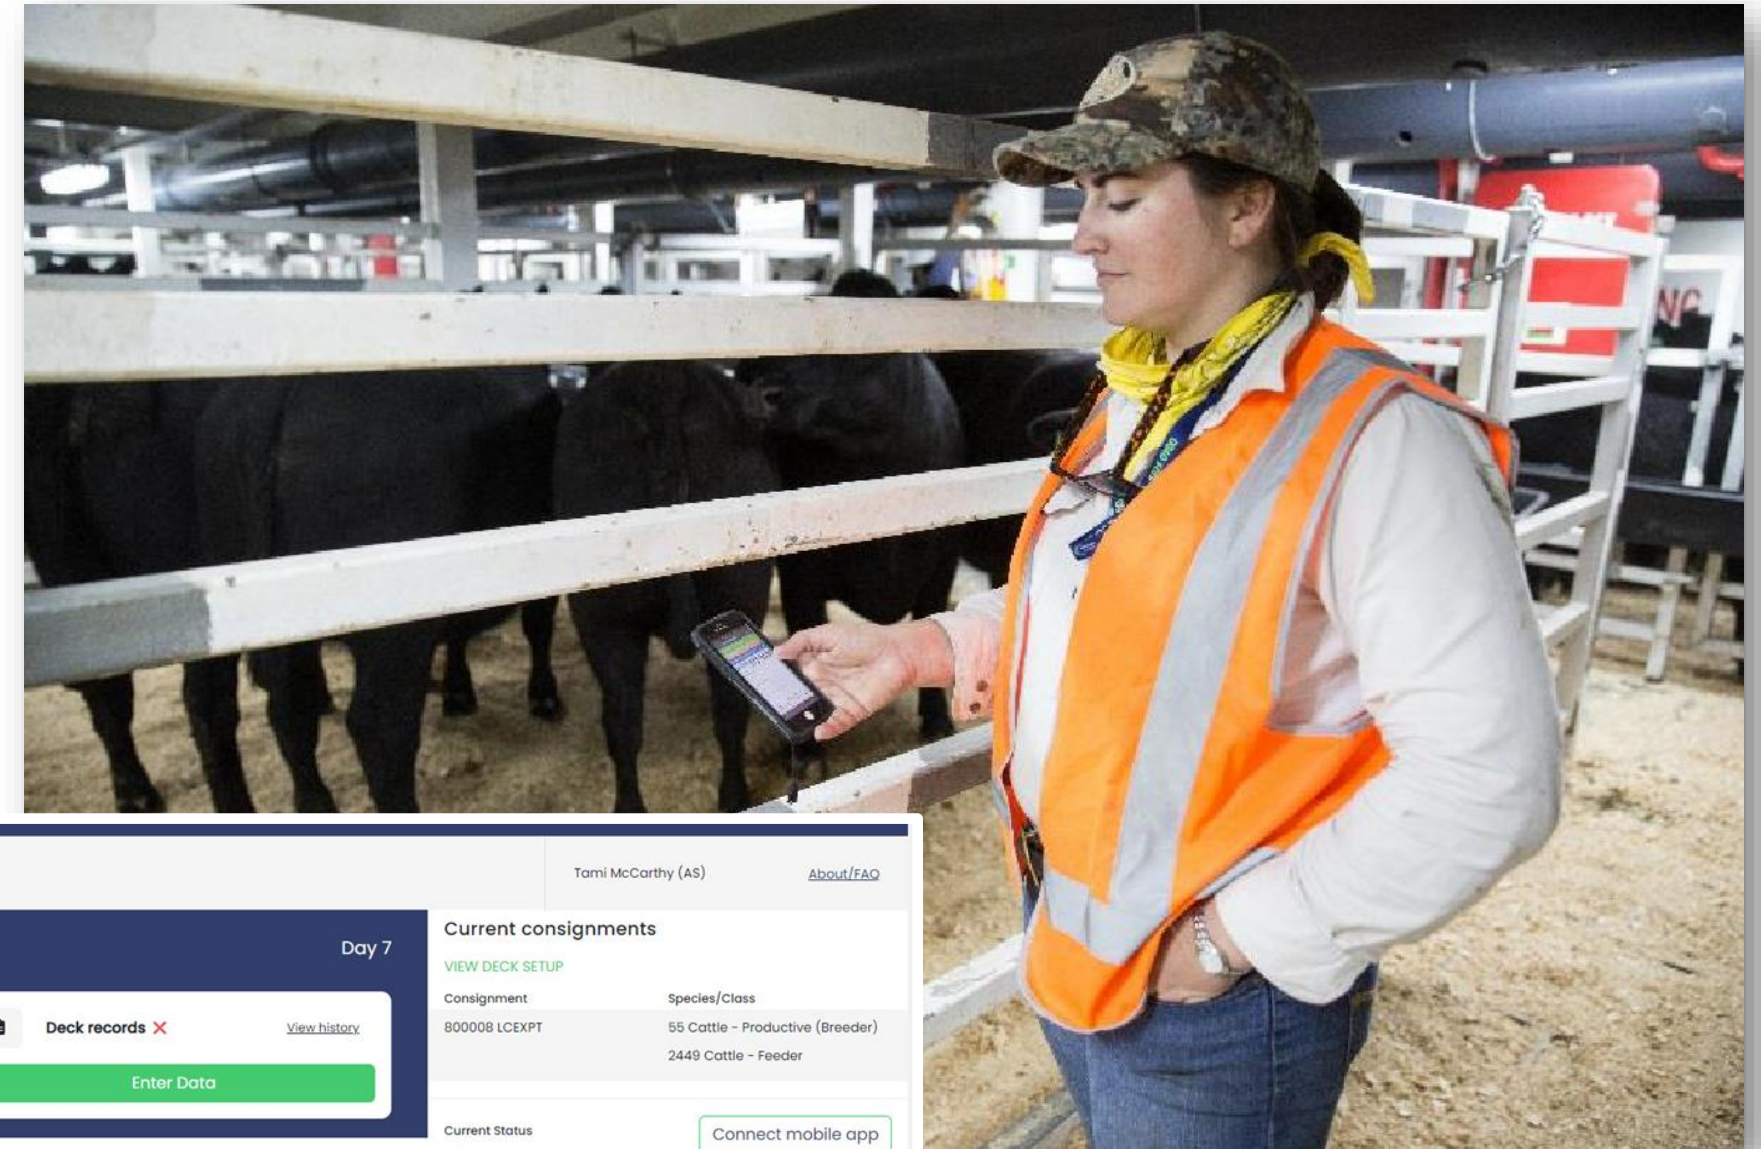

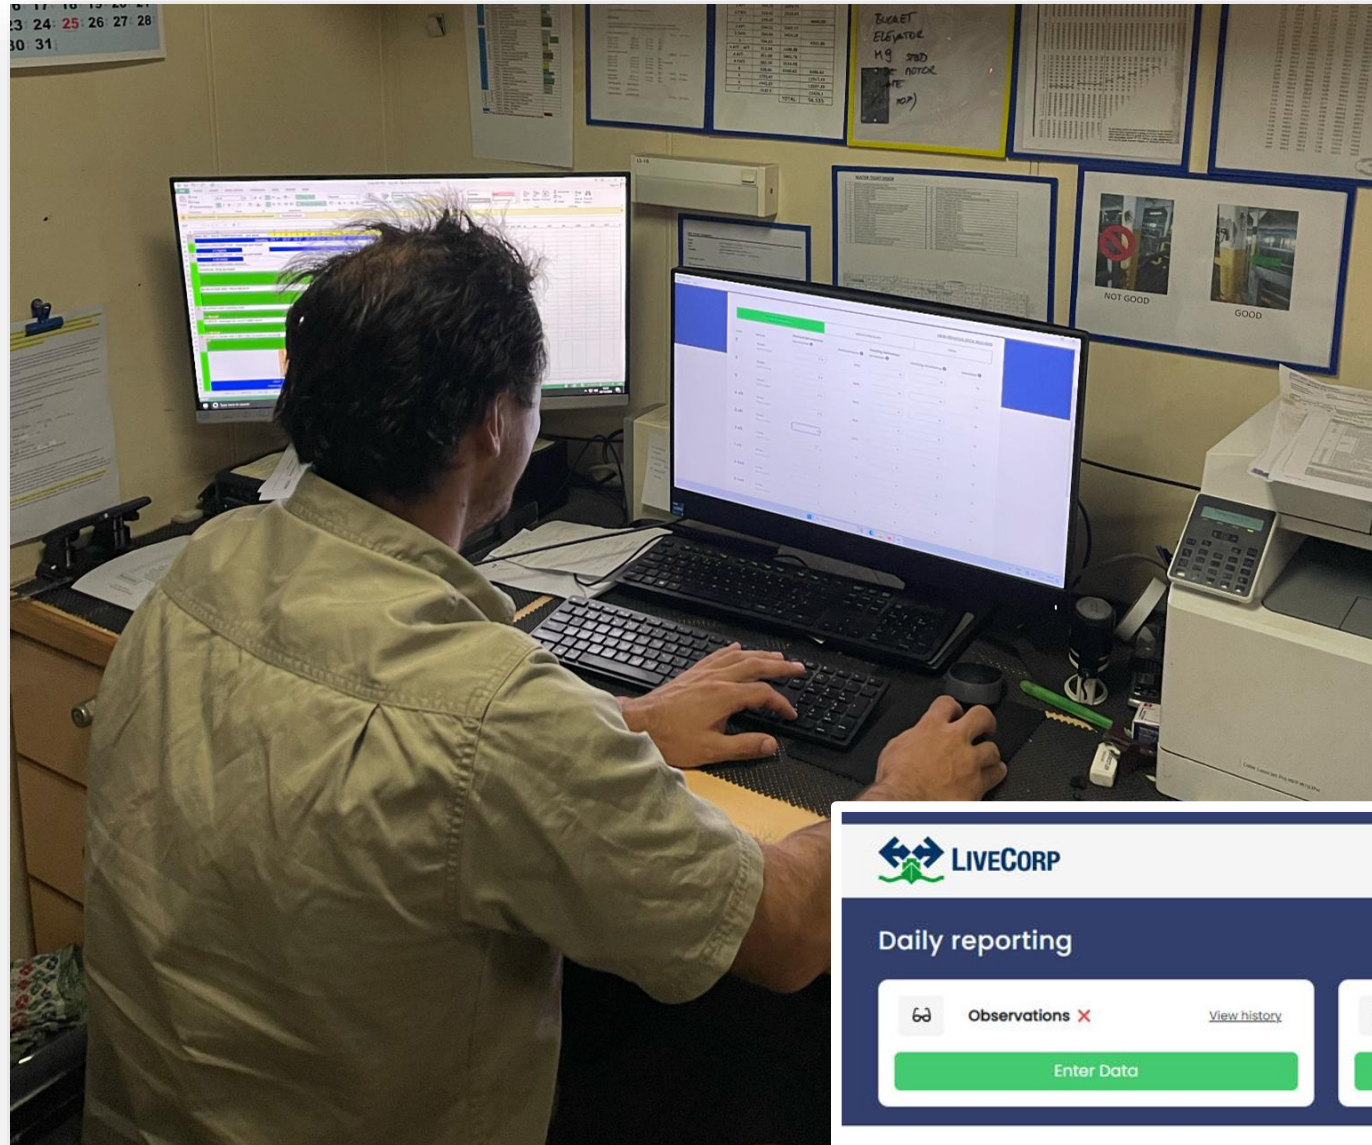

Mandy Matthews' Tip for Discharge:
"Sheep need friends. They aren't going to run if they are by themselves."

Jane Pinkerton's Tips for discharge:
"Use all your resources. Manage your crew and liaise with stevedores and exporters for an efficient discharge. It's a marathon not a race."
